The innovation is the property of M. Pestil-ion, and was first introduced at the Prison

Paper to Wrap Turkers In.
"I deal alread entirelyin greens brown
paper," said a Diago street paper morthant to
the ubliquitous reporter. "Most of the paper
mills are situated in the New England states,

the ubiquitous reporter. 'Most of the paper mills are situated in the New England states, little great quantity of paper is manufactified throughout New York state, especially along the constern border."

'What is the paper made out off queried the reporter.

Straw and water Almost any kind of state will answer, and I think that come take well answer, and I think that come take have also been pressed into service, although the paper made from this material was inferior in quality. Phall threads wholst for rye straw, well bound, is preferred. In the manufacture of paper the straw is purposed and haid closely in huge wats. Time is apprinked over every layer, and when the varies are full, line water' is thrown over the whole. Steam is then turned on at the follow of the vats, and the straw is allowed to cook until it is throughly practiced. If is then passed through a large everlving washer and closued from the lime and other impurities. The straw, or what is left of it, is next parish through granders, which reduce it to a wind not in the first dearn into a large full.

Innumies Dirt Cheap.

Dr J 1, S Grant B.y, of Cairo, Egypt, I've spent twenth flox years in the land of the Phare 3-4 and speaks all the languages of that jod glot occurry. In order to instruct the native doctors, two persisted by labeling the medical paper which has met with success. For years he has devoted his time be the study of archaelogy, and has amassed chough Fgyptian gols, from Horus at Olivia down, to userly fill the figtropel lam Museum of Art. The mammales of Feyph is said, were now dirt cheap, owing to resk t discoveries. They both from \$10 to first and the proceeded it to the beautions as a curlosity and presented it to the beautions in Institution Spientists who formerly paid high prices for like, first class mammas of late years the discovering were bought principally by the agents!

Attiments of Nerrous Solifocts.
Some affect to believe that Increous subjects f fan their alteration for the purpose of attracting attention and symbathy. It is quite the frequency exaggarate their sofferings but that is more up for denying their existence. Hes des, it is natural, to exhere a command so how the fit procedure.

MYSTERIES INTO WHICH THE GERRY COMMISSION HAS BEEN INQUIRING. The Garrote and the Guillotine-Neath by Prumin hold-A Finsh of Lightning

Is Beat.

How shall we are use our criminals?

To a certain liggree's distressing question to imprice into bet in reality a most humano investigation. Experts are divided in their opinions upon the subject, and when experts disagree—why expert disagree. Some hard shelted experts of a very conservative frame of mind hall their colors to the mast and hold that Jack Ketchy braippen, notes, also known as Judge Lynch's 'grayat,' is the proper thing when in the proper place.

Others of a neon advanced frame of mind suggest the partota. The guillotina also has its advocates, expectably among the inhabit tagis of sunny France, and there are those who favor prussib add or sume other vicient poison. Gas comes in fur a share of Javor, water has its disciples, but the enterprising students of this contury seem to be pooling their issues in favor if a setricity. Not to be beined the times, an American physician has devened a flash of lightning, said to be almost equil to the natural article. In this imprace it is ill came about through the inquiries made a war age by Commodore Gerry's commostion of appointed to, inquire into a more bumano bethod of executing the death penalty.

death penalty
At that time a select number of prominent

into a more humber of executing the death penalty.

At that kine a peloculumber of prominent physicials, were couse ted and eaked in the interest of science to answer a series of questionates of science to answer a series of questionates, and the period of the study of clothicity while pursuing his medical studies.

Dr. Kauffman was much impressed with the barbarity of dreedions by hangles, and before making his report to the computation legan work upon an electrical mechine. I while a supplier of the computation of lightning or confineds a decertic spark twelves lacked to produce draft in the two-hundredth part of a second.

This may seen to be quick work, but list is comparatively slow when we take index consideration that the scenume article, fired I gentling, produces the flatal result in the tent tous and a second of the first questions acked by the commission, was in regard to account that is about as sear as it has been according gauged up to this writing.

One of the first questions acked by the commission, was in regard to defined that there is an a strong policion. Taking prussic acids as long to read was not question that the pression of products in the strong policion. Taking prussic acids as basis or Kanffmann it, lied that therein was a present to be produced in the product in the product of any one of prossion of the product and condition that pression and the strong of the product in the product in a product in the strong policion of the product of the product in the product of the produc

Eon.
One of the last questions asked the physicians by the conmission, and Dr. Kanffrmann, was
'What would you suggest as a better way
of doubt in cell that dasks, and what would
you suggest to compensate for the difference
in effect typing the criminal cases or works
to that offect.

you suggest to compensate for the difference in effect typing the criminal cases or words to that effect.

Death far, a electricity, replied the dector in substance, or then hy shock or by a contextion of the numal filling into page, can as very little change in the leady Indeed, the greater the shock the less change there is in the body. There top lighth from an intense shock, which would kill a man in say the obstandard his part of a second would make any shiftle change in this body. Now, as there ighan insufficence in this country of bodies by it of purpose of stimulific research. Dr. Kauffannan suggested that the bodies of all essented criminals should be turned over to the proper authorities for the purpose of selection in the country of selection in the country of selections. their existence. Besides, it is intural to exact apparato a generance so long its it remains suprecognized. Other as in the reality of the discussed sensations, but maintain that the only way to absolube them is by means of ration. They had that nervous persons ought to be taught to control liker nervos by their retwon and they instightant "plain speaking" is the strongest add to recovery. Their experience seems to complete this opinion. The sufference seems to complete the total, so they faury that the d'aplain speaking has effected a cure. Their facey fallow ever very for from the fact which it that the patients have transferred their compaints to a mere sympathetic ear—bline-teenth Century.

Water Tight Compartments a mare II is well understool by those who are familiar, with the construction of foreign stdeners that water tight of compartments are a stare and a chainon. In many cases they are lardly tight enough to hold common shot and the braces are sellom sufficient to withstand the water preserve. The recent lovide a seaso of the Proplad coast, in which many flyes were sacrificed goes to show that our inarties, as well as locumotive and civil engineers, have something to do in the way to strongthening structures.
